mittee from the Board of Underwriters. An agreement was finally proposed and unanimously indorsed by both committees, the purport of which is as tollows: "The insurance brokers will organize a board, and as soon as a sufficient number of both companies and brokers shall have entered iuto the agreement, then the insurance companies and agencies in New York City will do business with only such brokers as shall be members of the Brokers' Board; and on their part the brokers agree to place their risks, unless in exceptional cases, only in insurance companies parties to this agreement, and never to place any insurance under the rates established by the Board of Fice Under-Our readers can readily see that in ease the parties to this agreement succeed in perfecting this close combination, and continuing it by forcing into their ranks every insurance company and broker, they can levy just such tax as they please upon the insured. All chance of relief would be swept away from any merchant, manufacturer or person needing insurance. They must continue to pay what the board demands, or act as their own broker, with little prospect of doing better, as they have not the necessary experience and facilities for placing their own risks.

This, we think, is highly detrimental to the interests of all the parties concerned. As we have before said, we do not object to paying present rates so long as may be needful to enable the companies which have lost so heavily to recover themselves to some extent. the arrangement in question shuts out the possibility of all competition (if it could be carried out in the spirit in which it has been devised), because, as will be readily seen, no broker who has much business can continue his business and remain outside of the combination. In the end, however, it will act very unfavorably upon the parties to it-For a time, undoubtedly, all will go on harmoniously; but soon it will be found that brokers and insurance companies include among their number many who do not always live up to the precise letter of an agreement if it is for their interest to shade it, and therefore the strictly honest man will suffer while his less conscientious neighbor absorbs his business. This is the experience of every such combination, and when the break comes the reaction is always to the other extreme.

This is the more likely since the history of well managed insurance companies goes to show that the former rates yielded a most liberal percentage on the amount of capital invested, and the failure of any company heretofore must be attributed, not to the low rates at which risks were taken, but rather to exceptional causes or to injudicious and unskillful management; hence the present rates must be deemed exorbitant except as a temporary arrangement. To illustrate this fact we give the following tabular statement of some of the leading companies doing business in this city, showing amount of capital invested, dividends in money from time of organization to 1872, time of company in operation, profits over all expenses, including dividends from 1867 to 1872; losses paid to 1872 and premiums received to 1872:

|                            | Dividends  |            | Profits over  | p*         |             |
|----------------------------|------------|------------|---------------|------------|-------------|
|                            | in money   |            | ill expenses  | 1.         |             |

We have not before us a statement of the amount of paid up capital these companies possessed at the time of their organization, so as to be able to show the per cent of profit; as our readers know it was in the aggregate very

much less than given above as the capital of January, 1, 1873. But without that fact this statement shows clearly enough the profits of the insurance business when carefully conducted, even on the old basis of rates. And with present largely enhanced rates, if continued, what must be the return money thus invested will secure during future years. Can there be a doubt in any one's mind that such inducements will result in a large increase of insurance capital, the companies eventually becoming so numerous as to work the serious injury of the very combination which brought them into existence.

In the meantime what is the merebant to do. Some of the insurance brokers and insurance companies have thus far refused to join this combination. We can see no better way of helping oneself and keeping up a healthy competition in insurance business than by assisting these outsiders so far as it can be done. Gradually this number will be increased. Even many companies that are now called members of the league are ready at all times to act outside of it. Others will soop see that the effort has been a foolish one, and will hasten to clear themselves from all suspicion of connection with it; and in this way relief will come in due time.

As to the insurance rates, they will adjust themselves if left free to do so. Capital now is shy of insurance investments, and hence rates should be and must be high. This will have to be cured, and will be cured gradually by large profits. Old companies will thus become stronger, and new ones be called into existence. The excess of profits over and above a fair dividend should be placed to the surplus fund, so that additional security may be given to policy holders, and the companies be prepared to meet any such contingency as might arise from conflagrations like those of Chicago and Boston. This will be the policy of the better class of companies, and perhaps some legislative action compelling it in all cases would be appropriate and wise, though we think that the Legislature usually does more harm than good by its interference.

#### RAILROAD EARNINGS IN MARCH, AND FROM JANUARY 1 TO APRIL 1.

The receipts of our leading railroads for the month of March show in nearly every case a material improvement over the same month of 1872. Taking the reports altogether they show that railroad business has been more uniformly prosperous than in any month for some time past, as it will be observed that the differences on the side of increase are in many cases sufficiently large to make a considerable percentage of the whole earnings. It will be noticed that the earnings of the Cheago & Northwestern road are again furnished to the public, showing a considerable increase for the month; the same company has furnished a statement showing its gross earnings from the termination of its last fiscal year, May 31, 1872, up to March 7, 1873, to be \$9,669,273, against \$8,767,397 the previous year, an increase of \$901,875.

#### PHILADELPHIA AND ERIE RAILROAD.

(Returns for the Fiscal Year ended December 31, 1872.)

On the 1st of February, 1862, the Philadelphia & Erie Railroad, the successors of the Sunbury & Erie Railroad Company (being at that time open only about half its length) was leased to the Pennsylvania Railroad Company for 999 years, from February 1, 1862, with the understanding that the lessees should complete it to Lake Erie and operate it at a cost of 70 per cent of the gross earnings, allowing the lessors 30 per cent for the payment of interest on their funded debt. At the date of the lease upwards of \$10,000,000 had been expended on it. In 1864 the road reached Erie City, at a cost to that date of nearly \$18,000,000. Subsequent improvements and ever accruing interest has now raised the cost of the road to upwards of \$21,000,000. It is not, however as yet finished, and will require several millions additional to place it in proper order for economical working. The first requisites are a double track, the lowering of grades, additional sidings, &c., &c., all of which have been commenced and are now in progress. The means for the completion of the road and improvements, &c., have been raised by the Pennsylvania Railroad Company and paid for in the bonds, and preferred and common stock of the Pennsylvania & Erie Company. In the fall of 1869 the lessees having ascertained that they could not continue to operate the road under the then existing lease, submitted a proposal for its modification. This consisted mainly in annulling the terms of the 70 and 30 per cent clause in the original contract, and in lieu thereof provided that, after the payment of operating expenses, taxes, maintenance of organization, and interest on the Pennsylvania & Eric Railroad Company as available assets.

funded debt of the company, any surplus remaining should be paid over to the treasurer thereof for a dividend to the stockholders. This modified form of lease was submitted to a special meeting of the stockholders, held July 20, 1870, and by them almost unanimously accepted. Since this lease went into effect the road has been operated with regularity and dispatch. The business has gradually increased, but as yet has not earned a sufficient balance to divide among the stockholders. The improvements on the road already alluded to, all of which will be completed this year, and the trade expected from the Buffalo & Washington Railroad recently completed, and connected with the Pennsylvania & Erie Railroad at Emporium, will do much to hasten this result. The President of the Pennsylvania Railroad Company, in his last annual report, says in reference to this subject: " A small increase in the rates of freight charged in 1871, with an annual increase of tonnago arising from the development of the resources tributary to the line, will bring this among the dividend-paying railways if Annexed is a complete analysis of the report for 1872:

MARITIME DISASTER AND MARINE INSURANCE.-The great increase in maritime disaster and loss of life calls not only for national inquiry into its probable cause, but renders any plausible suggestion or reasonable theory upon the subject matter of much interest. One of the chief causes assigned for the loss of so many vessels is the fact of their being under-manned. In support of this the three following tables, compiled from the statistical abstracts for the United Kingdom, have been presented to Parliament by the London Board of Trade. The first table gives the average size of "registered vessels of the United Kingdom (exclusive of river steamers)" in 1850, and, after an interval of 20 years, in 1870; the second table shows the average number of men (exclusive of masters) for each vessel in 1850 and 1870; and the third table relates to the number of men (exclusive of masters) for every 100 tons, at the two dates respectively:

TABLE I .- AVERAGE TONNAOR FER VESSEL.

ships may justify a reduction, to some extent, in hands on board, in relation to size, yet the exhibit made by these tables of the reduction in the size of vessels engaged in the home trade, and the increase in size in both the other divisions, is remarkable, while the very large reduction in the number of men to each hundred tons, both in sailing vessels and steamers, is worthy of serious attention.

In this connection, we notice a letter from Mr. Henry Jenla, of

Lloyd's, published in the London Times of the 7th ult., containing a suggestion with reference to the vexed and difficult question of a "load line." The idea advanced is net only a new one, but the remedy advocated, if put into force, would certainly meet some of the objections to a "hard and fast line," while it might work a gradual and beneficial change. On the ground of being averse to gradual and benencial change. On the ground of Deing averse to more legislative interference with private enterprise than is absolutely necessary, Mr. Jenla very justly says that he would not centrol by law the depth to which a vessel should be laden, as this must ever vary with the alternation of seasons, variety of cargo and difference of voyage; but looking to the responsibility resting upon the shipowner in relation to life and property, he suggests that it would not be unreasonable to require the owner, when he enters his reason outwards at the Custom house, to dewhen be enters his vessel outwards at the Custom house, to declare his intention of loading her to a certain depth for the voyage tor which he then lays her on; such depth it should be perfectly veluntary for him to select, but when declared, it should, with possibly a small and sufe margin for unavoidable contingencies, be binding upon him. This declaration, when published in the various loading lists, would enable persons interested to ascertain, to some extent at least, whether the declared intention was a proper one or not, while at present no general means are available for forming a correct judgment as to loading prior, it may be; to the vessel leaving the data or decreased as the river when to the vessel leaving the docks or dropping down the river, when insurances have all been effected, articles all signed and contracts all completed.

#### CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS.

The following are the changes in the Redeeming Agents of National Banks approved since the 3d inst. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

From our own correspondent.

LONDON, Saturday, March 29, 1873.

Owing to the heavy withdrawals of gold which have been made from the Bank for export, the proportion of reserves to liabilities in this week's return has diminished from 43 to 38 per cent, and the result has been that the directors of the Bank of England have advanced their minimum rate of discount from 31 to 4 per cent. Their decision was made known on Wednesday, without waiting for the usual weekly meeting on Thursday, the applications at the Bank having been so numerous on that day as to necessitate an immediate upward movement. The Bank statement shows important changes. There is an increase of nearly £2,000,000 in "other securities," a decrease of £1,000,000 in the stock of bullion, and of £1,500,000 in the reserve. Since the advance the demand for money, though good, has been far from pressing; but no accommodation has been obtainable under the Bank rate. The effect of the rise has been scarcely perceptible, and why it should be other, wise is difficult to say, for the advance is only from 31 to 4 per cent, so that money is still cheap, while the position of the Bank remains satisfactory, the proportion of reserve to liabilities being above the average, or what has for years past been considered necessary, and as indicating a sound condition. It is asserted by many, however, that considering the vast increase during the last ten years in the extent of our commercial and financial business, the proportion of 33 per cent is inadequate; and that may possibly be the case just for the time that the indemnity payments are being made, and while our bullion market is subjected in consequence to considerable fluctuations. The existing cause of the upward movement in money is financial and not commercial. The mercantile hills affoat are considered to be considerably below the average, while there is a very large quantity of ficancial, chiefly American, paper on the market. The following are the present quotations for money:

| Per ce                    | ent. i | Per cent.                                                                                     |
|---------------------------|--------|-----------------------------------------------------------------------------------------------|
| Bank rate                 | 4      | 4 months' bank bills 41/@41/6 months' bank bills 42/@41/4 and 6 months' trade bills. 41/@41/4 |
| Open-market rates:        |        | 6 months' bank bills 414 @416                                                                 |
| 30 and 60 days' bills 4 @ | D      | 4 and 6 months' trade bills, 41/0/43/                                                         |
| 3 months' bills4 3        |        | 7.4                                                                                           |

The joint stock banks and discount houses have advanced their rates of interest for deposits one-half per cent, and the quotations are now as follows:

|                                      | Per cent. |
|--------------------------------------|-----------|
| Joint stock banks                    | . 3       |

Apart from the withdrawals of gold from the Bank there has been no feature of importance in the bullion market. Bar silver is rather dearer; but the supplies have been only moderate, and the demand has been rather quiet. The following prices of bullion are from the circular of Messrs. Pixley, Abell, Langley & Blake:

| GOLD.                                         |    | d.    | s. d  |
|-----------------------------------------------|----|-------|-------|
| Bar Gold per oz. standard, last price.        | 77 | 9%0   |       |

Foreign bills of exchange have been in good demand, and the rates have not varied to any important extent.

For a brief period the stock markets were affected by the advance in the Bank rate; but the flatness lasted for so short a period as scarcely to demand attention. Taken as a whole, indeed, the stock markets have been firm, and, as regards British railway shares, rather buoyant. The closing of "bear" accounts, and brilliant weather, together with favorable traffic returns, have imparted much firmness to the market for British railway shares, and the advance in prices has been considerable. American rail. road stocks have, on the other hand, been rather weaker; but the only depression has been in Illinois Central stock, which is decidedly weaker. The market for Erie shares, Atlantic & Great Western securities, and United States rolling stock shares, cannot be said to be wanting in firmness, as prices have had of late a rapid advance, while the decline which has taken place from the highest point is unimportant. Erie shares form, no doubt, somewhat of an exception; but they were forced up last year to an inconsistently high point by operators on an unusually large scale for the rise. The closing of those large accounts naturally brought prices down; and of late the movements have been of a less important character.

In Grand Trunk Railway securities a very large business has been transacted, and prices have rapidly improved. The ordinary shares are now quoted at  $27\frac{a}{4}$ @28½; the first preference bonds,  $74\frac{1}{2}$ @75½; the second preference bonds, 69@71, and the fourth preference bonds,  $38\frac{1}{4}$ @38½.

There has been considerable excitement in the telegraph market this week, a scheme having been put forward to onsolidate the existing companies without consulting the wishes of the respective boards. The title of the new company is the Consolidated Atlantic Telegraphs Company, limited, and the total capital of the proposed undertaking is £8,000,000 in £10 shares, 400,000 shares of which are to be preference, and 400,000 shares ordinary. Amongst the directors is Mr. McEwen, who was the originator of the scheme for raising £10,000,000 for the Grand Trunk, and who is the leading spirit in the present undertaking. Mr. McEwen is confident of the success of his plan; but it is difficult to see how it can be carried out, when the boards of the three existing companies are not only tacitly opposed to him, but are now arranging between themselves a plan of amalgamation. The new company proposes, as capital is subscribed, to purchase shares in any of the existing companies, or to give in exchange the shares of the company for those of the existing companies. What could induce a holder of Anglo-American stock to exchange his security for shares in the Consolidated Atlantic Telegraphs Company is difficult to conceive. Advantage there seems none, as the quondam holder of Anglo-American stock would only receive an amount of dividend less than that actually realized to the extent of the proportionate share of the expenses of management of the new company. But whatever may be the result of this scheme, it is evident that an amalgamation will before long be effected; but it is to be hoped that if that is carried out, the charge for messages will be fixed at the lowest point commensurate with the interests of the proprietary.

We have had a week of brilliant spring-like weather, and with a continuance of it it is hoped that the ill effects of a wet autumn and winter will disappear. Since the commencement of February the weather has been seasonable, and vegetation has been kept in check; but the heavy land farmers have complained, as the effects of the heavy fall of rain were too great to be quickly removed. Latterly, however, they have been able to make rapid progress, but it is not probable that at so late a period wheat will be sown. Some farmers may venture upon spring wheats, or April bearded wheats, but it is more probable that barley will be selected, as very high prices are now current for that commodity. In consequence of the fineness of the weather and a tolerably liberal importation, the trade for all descriptions of cereal produce has been dull, but without material change in prices.

Vegetation being far from forward, and there being less appre hension that late frosts will do damage, an abundant crop of fruit is anticipated.

The following statement, shows the imports and exports of cereal produce into and from the United Kingdom since harvest viz., from September 1 to the close of last week, compared with the corresponding periods in the three previous years:

|                          | IMPORT     | 'S.        |              |            |

GOOD FRIDAY EVENINO, April 11, 1873.

The Money Market .- Our financial markets virtually closed en Thursday evening, as the Stock Exchange adjourned over till Saturday, as well as the Cotton and Produce Exchanges, and a large number of business offices are closed. As Good Friday, however, has not yet been made a legal holiday, the banks are obliged to remain open, and a limited amount of business is transacted.

The tendency of money during the past week has been towards easier rates, apparently caused by the general feeling that the supply of funds at this centre must soon increase, and that the exerbitant figures now prevailing can not be maintained much longer. The actual rates paid for money have only improved to a limited extent, and there have been scarcely any loans on ordinary stock collateral at less than 1.64 per cent commission, while the range on such loans has been up to ‡ per cent. On Thursday afterneen, when there was some excitement on the street in - Tais is the price bid, no cale was made at the Board.

regard to presecutions under the usury law, as high as ½ per cen was bid for meney, and none was offered; but during the early part of that day-the last business day which we report-rates ranged up to 1-16 for one day's use, and 1 for money till Saturday.

The spasmedic movements in money on call are, of course, very unfavorable to any activity in commercial paper, and miscellaneous business in this direction is seriously checked. There has been some business doing in the paper of standard, and wellknown berrowers, both mercantile and bankers, as the exceptionally favorable rates at which their three and four months' paper could be had, offered an inducement to purchasers; the ordinary rates are about 12 per cent for prime names.

Foreign advices are not unfaverable. Monetary affairs are quiet in London at the advanced rates-the Bank of England remains at 4 per cent, and shows this week a decrease of £548,000. The Bank of France shews a decrease of 250,000 francs.

The last statement of our city banks (April 5) showed a large loss of legal tenders, and was generally accepted as an evidence that greenbacks had been withdrawn for speculative purposes. There was an increase in the deficiency of reserves of \$2,863,600, so as to leave a total deficiency of \$3,245,800 below the 25 per cent required by law. The total liabilities were \$315,402,800, and the reserves \$50,604,900. In the national banks the whole deficiency was \$2,209,100.

The following statement shows the changes from previous week and a comparison with 1872 and 1871:

| ı |                             | 1873          |                | 1872.         | 1371.        |

United States Bonds.—Government securities have been very strong, and—considering the monetary situation—pretty active. There is still a large demand from foreign buyers, who have taken this week as much as \$3,000,000 to \$4,000,000 bonds for the London market. Prices are firm in London, and the unequalled advantages of United States Government securities again turns the attention of foreign investors in that direction. At the close on Thursday 119 was bid for five-twenties of 1867, 1174 for 1862s, and 113 for coupon ten-forties. On Wednesday the Treasury bought \$500,000 five-twenties from total efferings of \$2,428,950.

Closing prices daily, and the range since Jan. 1, have been:

State and Railroad Bonds.—Among the Southern State bonds, Tennessees are somewhat weaker and Virginias firmer. There are no new developments affecting the values of Southern securities, though we notice a new litigation in Virginia on the state of their bonds. part of foreign bondholders to compel the funding of their bonds under the former law, and raising the question of the validity of the recent law. Railroad bonds have been only moderately active, the Union Pacifics being most largely dealt in, with some considerable transactions in the Boston, Hartford and Erie first mortgages.

It was semi-officially reported on Thursday that the New York Central loan of £2,000,000 sterling, or \$10,000,000, had been negetiated in London at about 96, gold.

Railroad and Miscellaneous Stocks .- The stock market has been well maintained under the monetary stringency, and shown a recovery from the depression of last week. The most buoyant feeling was on Thursday, when prices advanced 102 per buoyant leering was on Intrisary, when prices advanced 1267 per cent, but showed a reaction later in the day in consequence of the sharp squeeze in money which occurred in the afternoon. The principal activity has been confined to the leading speculative stocks, viz: Western Union Telegraph, Pacific Mail, Erie, New York Central & Hudson, Lake Shore, Harlem, Rock Island, St. Paul, and Union Pacific. Harlem has fallen off materially since the terms of the lease were made known, but for what reason it

does not exactly appear.

The statement of railroad carnings for the month of March and for the three months up to April 1 is given on another page, and presents a favorable exhibit of the current traffic of leading

roads.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week Saturday, Monday, Taeaday, Wedcarday Thursday, Friday,

The Gold Market .- Just after our last report the price of

The Gold Market.—Just after our last report the price of gold was advanced on Saturday to 119½, the highest point reached since the French and German war, in the Summer of 1870. After opening at 119½ on Monday the price declined and has been lower ever since. The immediate cause for the falling off in gold appears to be found in the fact that the clique sold largely to realize at the high figures obtained; but whether another upward turn may not be started is very uncertain, and it is considered unsafe to sell short. On Thursday the rates on gold loans till Saturday ranged from 1.16 to "flat" for carrying. The Treasury sold \$1.500,000 on Thursday, the total bids amounting to \$6,072,000.

The following is an extract from the new coinage law, which went into effect April 1, 1873.

"Sec. 14. That the gold coins of the United States shal be a one dollar piece which at the standard weight of twenty-five and eighth-tenths grains, shall be the unit of value; a quarter eagle, or two and a half dollar piece; a three dollar piece; a huff eagle, or five dollar piece; an eagle, or the dollar piece, and a double eagle, or twenty dollar piece. And the standard weight of the gold dollar shall he twenty-five and eight-tenth grains; of the quarter eagle, or two and a half dollar piece, and eight-tenth grains; of the eagle, or five dollar piece, one hundred and firty-eight grains; of the balf eagle, or five dollar piece, one hundred and fifty-eight grains; of the double eagle, or twe dollar piece, who hundred and fifty-eight grains; of the single piece, or two dollar piece, two hundred and streen grains; of the single piece, and, when reduced in weight below said atandard and 5lerance, shall be a legal tender at valuation in proportion to their actual weight."

The following table will show the course of the gold premium each day of the past week.

The following table will show the course of the gold premium each day of the past week:

E Foreign Exchange. - Exchange continued dull and depressed

Exchange continued dull and depressed till Wednesday whon rates were advanced, and again further advanced on Thursday—the rates for prime sterling closing at 107½ for 60 days, and 108½ for short sight. The advance was based on the larger mercantile demand and the better appearance of the money market and lower gold.

The Times says: "Congress having recently fixed the Mint value of the £ sterling of Great Britain at 4 dollars 86 cents 6½ mills in American gold coin, its real weight at our Mint, it is satisfactory to know that the same act forbids all recognition of the present and long-accepted practice of calculating and selling exchange on London on the conventional basis of 4 dollars 44 cents 4 mills to the £ sterling after the 1st of January next. All exchange on London on the conventional basis of 4 dollars 44 cents 4 mills to the £ sterling after the 1st of January next. All contracts thereafter made on this basis are declared null and void. The £ sterling or sovereign of Great Britain being now worth 4 dollars 86 cents 6½ mills, the actual par of exchange is 100 per cent, whereas the conventional value under the old practice is made 109½ per cent. After next New-Year exchange will be quoted at a discount or at a premium on the real par, according to the ruling of the market. Thus, what we now call 107½ per cent would be about 98 per cent, and what we call 110 per cent would be about 100½ per cent."

The following were the nominal rates at the close on Thurs-

#### STATE, CITY AND CORPORATION FINANCES.

#### EXPLANATION OF STOCK AND BOND TABLES.

1. Prices of the most Active Stocks and Bonds are given in the "Bankers' Gazette," previously. Full quotations of all other securities will be found on preceding pages.

2. Government Securities, with fail information in regard to each same, the periods of interest payment, size or denomination of bonds, and numerous other details, are given in the U.S. Debt statement published in THE CHRONICLE on the first of each month

3. City Honds, and Hank, Insurance, City Railroad and Gas Stocks, with quotations, will usually be published the first three weeks of each month, on the page immediately preceding this.

4. The Complete Tables of State Securities, City Securities, and Railroad and Miscellaneous Stocks and Bonds will be regularly published on the last Saturday in each mouth. The publication of these tables, occupying fourteen pages, requires the issue of a aupplement, which is neatly stitched in with the usual edition and furnished to all regular subscribers of The Chaonicle.

#### St. Louis, Kansas Clty & Northern Railway .-

(Returns for the Fiscal Year ended January 31, 1873.)

The St. Louis, Kansas City & Northern Railway Company are successors of the North Missouri Railroad Company. The failed on their second mortgage bonds, and were sold out under foreclosure August 26, 1871, and their property was purchased by parties, from whose hands it passed into the possession of the present company, which was organized under the General Railroad Law of the State of Missouri, January 2, 1872, and took possession thereof on the 6th day of February ensuing. By the foreclosure of the second mortgage, and sale under it, the property was discharged from all claims subsequent to the first mortgage of \$6,000,000. The basis of the reorganization was as follows:

... \$30,000,000 The property, when it passed into the hands of the new company, was very incomplete and imperfect. Many improvements and additions have been made during the past year, and it is claimed that its present condition and efficiency will compare favorably with the best roads in Missonri. But in order to meet promptly all demands, and conduct with safety and economy all the traffic which can be obtained, the policy heretofore pursued in regard to improving the condition, and adding to the capacity of the company's lines, must be continued.

The work of constructing a continuation of the line from the point where it connects with the Hannibal & St. Joseph to the bridge of Kansas City (91 miles), so as to avoid difficulties and delays occasioned by the joint occupancy of a single track road by the trains of two competing companies, has been delayed by legal obstacles, which have been recently overcome. The work has been resumed, and the company promise soon to have a complete and independent line from St. Louis to Kansas City.

The construction of a system of repair shops for locomotives and cars at Moberly, which shall be adequate to the wants of the company, will soon be completed, and will result in reducing largely the cost of repairs, which have heretofore been made without proper machinery and tools.

In order to meet the competition by other lines in St. Louis, the cost of draying (between North Market and Carr streets), large quantities of freight designed for shipment or which has been transported over the company's line, has been paid during the past year. Many thousands of dollars have thus been lost by reason of not having proper tracks and depots near the commercial centre of the city. After considerable delay permission was obtained from the municipal authorities for extending the tracks and the work was commenced. The unusual inclemency of the winter, however, rendered it impossible to prosecute it at any reasonable cost, and all operations ceased for the time being. The Depot buildings, with the necessary grounds and tracks, as projected, will cost about \$450,000. Additional grounds and build. ings are also much needed at Kansas City. The following esti. mate at expenditures for "construction" during the current year is submitted:

| To complete ahops at Moberly.  For machinery and tools for shops at Moberly. | \$40,000 |
|------------------------------------------------------------------------------|----------|
| For machinery and tools for shops at Moberly                                 | 45,000   |
| To complete track to Kansas City                                             | 195 000  |
| For additional grounds and buildings at Kansas City                          | 40,000   |
| For real estate, tracks and buildings at St. Louis.                          | 450,000  |
| For additional rolling stock                                                 | 300,000  |
| -making a total of \$1,000,000, which amount, it is pres                     | umed,    |

can be easily procured without calling upon the stockholders. The additional facilities thus afforded would add to nett receipts a very large percentage on the sum required.

During the past year the tracks, building and bridges have been much improved. There were used in repairs of tracks 2,650 tons of new and re-rolled iron, and 133,151 cross-ties. The increase of rolling stock has been-by purchase, 20 lecometives, 5 passenger ceaches, 150 box, 150 stock, 50 platferm, and 100 coal cars, and from the company's shops, 3 passenger coaches, 2 baggage, &c., and 10 freight and other cars. The work of rebuilding and repairing old equipment has also been very large.

The average operating expenses of the company's lines amounted last year to nearly seventy-three and one-tenth (73.1) per cent of gross earnings. This large percentage is due mainly to causes rendering imperative expensive repairs, the cost of which has been charged to this account. It is also increased to a very considerable degree by reason of the very small amount of traffic on all the lease lines and on the northern division of tho company's lines. In several instances the cost of operating and maintaining exceeds the gross amount collected for traffic services. Nevertheless the lines referred to are remunerative as auxilliaries, and pay indirectly through the traffic they bring to and receive from the main line. The year's business was also materially affected by the short crops in Kansas and Missourl and the tide of emigration throughout the year was comparatively insignificant.

#### ROAD AND EQUIPMENT.

 Ratio of expenses to earnings 1871
 66.38 per cent.

 Ratio of expenses to earnings 1872
 61.10

The President's report says:

Satisfactory as this result unquestionably is, it could have been rendered much more favorable had not a large portion of our fall transportation to the West been sacrificed in a bitter contest for the control of business. Our loss in this connection, though comparatively small, cannot be estimated at less than \$30,000. It might, perhaps, not inaccurately be placed much higher.

A noticeable as well as an encouraging feature of the road's business during the year is the increase and healthy character of the loss of training the search of the loss of the search of the loss of the search of the loss of the search of the loss of the search of the loss of the search of the loss of the search of the loss of the search of the loss of the search of the loss of the loss of the search of the loss of the search of the loss of the search of the loss of the search of the loss of the search of the loss of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search

the local freight.

There have been moved over the road 266,707 tens of all classes of merchandiso and produce, at an average charge per ton of

The expenses have been ..... These figures comprehend every expenditure on account of the

road, its track, locomotives, cars, running of trains, and conduct of entire business of transportation.

Compared with the previous year, they will be found to be less in the sum of \$23,753 02, a result very creditable to the executive branch when due regard is had to the large increase of work

The ratio of expenses to earnings will be found to be 61.10 per cent, a proportion nowise in excess of the cost of eperating im-

portant Southern railroads.

The variations of the figures of the principal accounts representing debt, from those of the preceding year, result from settlements of transactions, reported and authorized by the stockholders, modified, of course, to some extent by the applica-tion of the earnings. The view is thus illustrated:

| ١ | Bills payable December 31, 1871<br>Bills payable December 31, 1872.                                                                                                                                                                                           | \$877,172<br>1,000,760 | 12<br>35 |

To meet our urgent demands, and also to retire in great part our floating debt, the Board resolved during the past summer to create a second mortgage upon the property of the company, to tober 1, 1872, at the rate of 7 per cent interest, and having thirty years to rue.

These bonds are offered for sale to the helders of our nonmortgage boods at seventy-five per cent, payable one-third in meney and two-thirds in bonds at similar prices, the cash receipts

from the sale to be applied to the reduction of the fleating debt.

The progress of the exchange in London of our sterling first mortgage bends for the State guaranty bends of 36 and 66 has been very satisfactory. At the date of our last report the exchange had reached £239,000. The latest date of last year reports the figures as high as £293,000, leaving only about £30,000 neaverly about £30,000. unexchanged to complete this important transaction.

The Southwestern Railroad Bank in our last report stood charged with \$574,628 46.

The account now shows \$593,635 13.

New Orleans, Baton Ronge & Vicksburg.—By the amended New Orleans, Baton Ronge & Vicksburg.—By the amended charter of this Company the line will begin in New Orleans, instead of on the New Orleans, Jackson & Great Northern, 60 miles north of the city. The Company is authorized to issue first mortgage bonds to the amount of \$30,000 per mile, and the State of Louisiana is released from its premise to endorse the second mortgage bonds to the amount of \$12,500 per mile. Surveys have been commenced on the line from Shreveport to Alexandria, La., under charge of Assistant Engineer G. M. Walker.

Jeffersonville, Madison & Indianapolis.—The President, Thomas A. Scott, announces that this Company's second mortgage bonds, maturing April 1, and then payable at the Bank of America, New York, will be redeemed in cash at that time, or, if the holders prefer, they may receive first mortgage sinking fund bonds, principal and interest guaranteed, for the maturing bonds, at the rate of 95. The exchange will be made bond for bond, and the difference of five dollars per hundred will be paid in cash at the time of making the exchange,

New York & Harlem.—Notice is given to holders of first mortgage bonds, due May 1, 1873, that such bonds can be exchanged, bond for bend, at any time on or previous to that date, for the new consolidated 7 per cent mortgage bonds, due May 1, 1900.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | ### The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAY NIGHT, April 11, 1873.

There has been a general breaking up of the ice in the navigable streams during the past week, attended, in some quarters, with floods which have inflicted damage; and on the great lakes steamers have been able to make their way from Detroit to Cleveland; but in the "Straits," which connect the upper with the middle lakes, the ice, at last accounts, was firm and compact, and until vessels may proceed from Chicago to Buffalo, navigation cannot be considered as having been fully resumed. The State canals have been injured to some extent by the floods, and their reopening may be thereby delayed. The Welland Canal will be opened on the 21st instant.

The tone of trade circles has not been so unsettled as last week. matters seem to have, in a measure, adjusted themselves to the state of affairs in Wall street. Holders of merchandise seem disposed to meet the demand at fair prices, and speculative action is very limited. To-day being Good Friday business down town is generally suspended.

In provisions there has been further improvement for some description of hog products; but the market has lacked general buoyancy; and in bacon the difference between Western and city packed has become quite decided. Cut meats, including hams, shoulders and bellies, have, for an exception, taken a downward turn, owing, no doubt, to the fact that they advanced earlier and more decidedly than other hog products, and were relatively high. Of pork the sales have embraced new mess at \$17 35 for April, and \$17 50 for May; of bacou, city long clear at 91@98c.; Western do., 9@91c., and Western long and short clear together at 9\c. for April; of lard, prime Western steam at 8\columnomale @8 15-16c. on spot and seller April; 9 1-16@91c. for May; 98c. for June, and and 95c. for July; but, on Wednesday, May and the later months were 1-16@1c. off these prices; dry salted shoulders declined to 7c.. and pickled and smoked meats became quiet. Beef has been in fair demand and firm. Butter has been unsettled, new arriving more freely; and cheese has been a little depressed by the decline in the Liverpool market. The following will show the course of exports from New York from November 1 to April 8, inclusive, for three years:

|           | 1872-73.    | 1871-72.    | 1870-71    |

dry Texas.

Freights have been fairly active, and rates have had an irregular

Freights have been fairly active, and rates have had an irregular advance—most decided, however, by the Liverpool steamers, by which on Wednesday there were large shipments of bacon at 60s, and cotton at \( \frac{1}{2}\text{0.9} \) 16d., with grain quoted at \( \text{8.08\frac{1}{2}}\text{d.} \); and a sail vessel took 4,000 tos. lard at 32s. 6d. from store. Several grain charters to Cork for orders have been made at 6s. 9d. Petroleum charters have been less active, and as low as 5s. 3d. has been accepted for German ports, but 6s. 6d. has been paid to Gibraltar for orders, and 7s. 10\frac{1}{2}\text{d.} for Odessa. Yesterday 30,000 bush. grain were shipped to Liverpool by steam at \$80\text{84d.} and 300 bbls. pork

for orders, and 7s. 10½d. for Odessa. Yesterday 30,000 bush. grain were shipped to Liverpool by steam at 8@8½d., and 300 bbls. pork by sail at 4s., and the charters embraced a vessel with 2,800 bbls. refined petroleum from Philadelphia to Copenhagen at 6s. 10½d.

The market for Kentucky leaf tobacco has been fairly active at steady prices. The sales of the week have been 800 lihds., of which 200 hhds. for export, and 600 hhds. for consumption, mainly of new crop, at 7@8½c. for lugs and 8½c@14c. for leaf. Seed leaf shows an improved demand at firm prices; the sales for the week were not fully made up, but they embraced the following: Crop of 1870, 200 cases sundries, 9@11c.; crop of 1871, 100 cases Connecticut, 20@55c; 100 do. Ohio. 15c., and 75 cases Wisconsin on private terms! and crop of 1872, 45 cases Wisconsin, 6c., and 115 cases Pennsylvannia on private terms. Spanish tobacco less active; sales 400 bales at 90c@\$1 05.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1873, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show total values, including the value of all other articles besides

#### COTTON.

FRIDAY, P. M., April 11, 1873. By special telegrams received to-night from the Southern ports, we are in possession of the returns showing the receipts, exports we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, April 11. It appears that the total receipts for the seven days have reached 48,945 bales against 48,637 bales last week, 56,015 bales the previous week and 74,195 bales three weeks since, making the total receipts since the first of September, 1872, 3,107,320 bales against 2,499,274 bales for the same period of 1871-72, showing an increase since September 1, 1872, of 608,046 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of the five previous years are as follows:

The market the past week opened quiet, but with a better tone; since Monday, however, it has been dull and drooping. Late on Saturday gold advanced to 119, while the receipts at the ports were quite small. As a result, shipping orders to a considerable extent came upon the market (although Liverpool was reported witer) and our expectations were advanced by Monday. extent came upon the market (armough Inverpool was reported quiet), and our quotations were advanced \(\frac{1}{2}\)c. On Monday, not withstanding gold continued firm, this demand subsided, and with receipts at the ports fuller, the tone was less favorable. Tuesday and Wednesday, the same influence prevailing, and gold also being lower, while Liverpool showed a partial decline, our quotations were reduced \(\frac{1}{2}\)c., returning to last Friday's figures. Yes quotations were reduced \$\frac{1}{2}c\$, returning to last Friday's figures. Yesterday the market was more steady, but quiet, and to-day, being Good Friday, the Exchange was closed. For future delivery the fluctuations and recent decline have been more marked than in cotton on the spot, because the effects of a falling off in the receipts and the speculation in gold have a freer scope, while the money market and rates of freight and exchange do not come so actively into the account. Therefore when cotion on the spot advanced \$\frac{1}{3}c\$. futures were up \$\frac{1}{3}\mathbb{Q}^2_6c\$, and while the former was declining \$\frac{1}{3}c\$, the latter fell off \$\frac{1}{3}\mathbb{Q}^2_6c\$, and while the former was a partial recovery, favored by a falling off in receipts and some advance in gold, but the demand was not brisk. The prices for futures last reported were (hasis low middling) 18 25-32c. for April, 19 1-16c. for May, 19\$\frac{1}{3}c\$, for July. The total sales of this description for the week are 67,100 bales, including — free on board. For immediate delivery the total sales foot up this week 9,425 bales, including 5,915 for export, 2,404 for consumption, 607 for speculation, and 500 in transit. Of the above 506 bales were to arrive. The following are the closing quotations: The following are the closing quotations:

WEATHER REPORTS BY TELEGRAPH—The weather the past week has been favorable for plantation purposes, though in some sections it appears to have been unseasonably cold a portion of the time. Our telegram from New Orleans states that there has been no rain there this week except a thunderstorm on one day. At Mobile there has been a frost, and since Wednesday the weather has been too gold for dayaloning the seed planted though as the has been too cold for developing the seed planted, though as the

week closes there has been a favorable change; they have also week closes there has been a have also had rain on one day. At Selma there has been no rain, but beautiful weather, with a cold snap and light frost Wedneaday night. Our Montgomery telegram makes no mention of cold weather, but states that it has been pleasant all the week with the exception of the states that it has been pleasant all the week with the exception. tion of one day of rain; good progress is being made in planting. It has rained on one day at Columbus, and they have had one light frost. At Macon it has also rained on one day, and farm work is stated to be making good progress. They have had warm and dry weather at Charleston and Savannah all the week. It has rained two days at Nashville; planters are said to be much behind. Thermometer at Savannah has averaged 70, Selma 71, Macon 74 and Columbus 70.

BOMBAY SHIPMENTS .- According to our cable dispatch received to-day, there have been 26,000 bales shipped from Bombay to Great Britain the past week and 16,000 bales to the continent, while the receipts at Bombay, during the same time have been 48,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, April 10:

Shipments this week to Shipments since Jan. 1 to Great Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Conference Con

Shipments this week to Shipments since Jan. 1 to Great Con-Britain tinent. Total. Britain. tinent. Total. 26,000 16,000 42,000 250,000 96,000 346,000 Total. receipts. 346,000 48,000 464,000 20,000 1873.... 36,000 312,000 152,000 34,000 198,000 104,000 1372.... 27,000 9,000 1871.... 22,000 12,000 198,000 104,000 302,000 56,000

From the foregoing it would appear that compared with last year there is an *increase* this year in the week's shipments from Bombay to all of Europe of 6,000 bales, and that the total movement since Jan. 1 shows a *decrease* in shipments of 118,000 bales compared with the corresponding period of 1872.

GUNNY BAGS, BAGGING, &c.—The bagging market has ruled General Bags, Bags, Bags Racing, &C.—The bagging market has ruled very dull and quiet during the past week. The stringency in the money market has checked all speculation, the only sales reported being the filling of small orders. We quote 13c., cash, as price asked on spot, and 14½@15c. for future deliveries. Bags remain quiet, and there is but little doing. We hear of a sale of 50 bales at 15c., and quote the market price at 15@15½c., according to weights. For butts the market has been considerably weaker, and sales have been reached at 2c. ask, and there are still covered. and sales have been noted at 2c. cash, and there are still several parcels which might be bought at that figure. Sales have been parcels which might be bought at that figure. Sales have small. About 1,500 bales at 2c. cash, and 2 3 16c. on time.

VISIBLE SUPPLY OF COTTON MADE UP BY CABLE AND TELE-GRAPH .-- By cable we have to night the stocks at the different European ports, the India cotton afloat for all of Europe, and the American afloat for each port as given below. From figures thus received, we have prepared the following table, showing the quantity of cotton in sight at this date (April 11) of each of the

9.657 16.365 93.173 6.270 14.636 52.817
Our Memphis telegram has failed to reach us to-night, and the figures for that point are therefore estimated.

The above totals show that the interior stocks have decreased dur ing the week 7,683 bales, and are to-night 40,356 bales more than at the same period last year. The receipts have been 3,387 bales more than the same week last year.

CROP ESTIMATES.—We have, during the past week, received several additional estimates of the total of the present crop, based upon the percentage of increase in the receipts for the remaining months. As stated on a previous occasion, we made no attempt, in our figures, to vary the conclusion reached hy any such comparison, but simply gave the result of the reports of our correspondents from each district, taking the minimum figure because it is safer to err on that side. We are now, however, approaching the period of expectation and these correlations. the period of exhaustion, and these compilations begin to possess increased interest, as they are assuming a more close approx-

imation to actual facts. It may be well, therefore, for us to indicate one or two points which, if included, will serve to help any who desire to work out an approximation to the correct total. For a text we give the following, received yesterday, from a correspondent in this city:

As a matter which may be of interest to your readers, we enclose some estimates of receipts of cotton at the ports as compared with those of the past year. The figures sufficiently explain themselves, and are based on official returns of the New York Cotton Exchange:

3,425,000

That is to say, we require 60 per cent increase over receipts of last year to make a crop of 3% millions of bales.

First, then let us follow the form our correspondent has taken here, only we will use our own figures instead of those he has adepted, and bring the statement down one week later.

Receipts at the ports (from April 11 to Sept. 1, 1872).... 233.000

Total Receipts at the ports (for year ending Sept. 1, 72).2,732,000 1873-

60 per cent increase......140,000— 373,000

Total receipts at the ports (for year ending Sept. 1, 73). 3,479,000 By this process we reach an increase in the receipts at the ports of 747,000 bales as compared with last year. Now if we add this figure to last year's crop the statement would be as follows:

land the same)......

In this result it will be noticed that all the incresse we give over last year from this time (which includes increase in receipts at the ports, Southern consumption and overland) is 140,000 bales. Now are there any indications that this is an understatement? (1) Southern consumption last year was given in the crop state ment at 120,000 bales. We hope this year to obtain returns from the mills so as to place that subject in the region of facts; in the meantime, however, it is well for us to remember that those who are best able to judge of that matter in this city and Boston give the year's consumption of the Southern wills at 140,000 to 150,000 are best able to judge of that matter in this city and Boston give the year's consumption of the Southern mills at 140,000 to 150,000 bales; if this estimate is correct we have in this one item an increase in the crop of from 20,000 to 30,000 hales. (2) At the seven Southern Interior ports "there was last week in sight 40,000 bales in excess of the same week last year, and at the Northern ports (such as Cincinnati, etc., which are not as yet included in the port receipts) about 25,000 bales more, which gives us an increase of 65,000 bales in sight, without counting other interior Southern ports all of which we for as they have come to our notice show. ports, all of which, so far as they have come to our notice, show larger stocks that a year ago. (3) It will be noticed in our general table that the total receipts up to this time at "New York" and "Other ports" (which latter includes Boston, Baltimore, and Philadelphia) are this year about 43,000 less than for the same time a year age; hence, if the total overland movement is the same as last year, 43,000 bales more must have gone direct to the mills, and does not come into our receipts at the ports; in other words, if the overland movement proves to have been as large as last year, 43,000 bales will have to be added this year to the item in last year's crop statement of shipments "direct to manufactures".

Here, then, in these three items, we have a probable increase which we can already see of, say 138,000 bales, which is about equal to the total increase (140,000 bales) estimated above. Is it not, therefore, pretty certain that the crop will be at least 3,721,000 bales, and probably somewhat in excess of that figure?

facturers.

The exports of cotten this week from New York show a decrease since last week, the total reaching 10,581 bales, against 12,960 bales last week. Below we give our usual table:

Exports of Cotton (bales) from New York since Sept.1, 1872

SHIPPING NEWS.—The experts of cotton from the United States the past week, as per littest mail returns, have reached 50,129 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRON-ICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of this week:

| TOTAL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |         |

#### BREADSTUFFS.

FRIDAY P. M., April 11, 1873.

Flour ruled dull and weak until Wednesday. Receipts by rail showed considerable increase, and the tendency was nownward. The general demand fell off, and buyers would not purchase, except to supply immediate wants. The little export demand that was noted was from Loudon and the West Indies. Under this state of affairs prices experienced a slight and somewhat irregular decline. On Wednesday, however, the local trade bought much more freely, and there was a general shipping demand from the British provinces, from Great Britain, and the West Indies, but business was checked by the firmer views of holders. For good lines of extra State \$7 25 was bid, and \$7 40@\$7 50 asked. To. day there was less activity and some weakness in prices, especially for lets on the wharf.

Wheat has been dull and heavy; No. 2 Milwaukee has been sold to a limited extent at \$1 62@\$1 65 in stere and affect; but the principal business has been in car lots of rejected and No. 3 Spring, mostly at \$1 40@1 50. An advance in ocean freights and depression in exchange have counteracted the effect of small stocks, and more favorable advices by cable. On Wednesday there was a steadier tone, but very little done. Yesterday the demand somewhat improved, and the sales embraced a boat load of No. 3 Spring at \$1 53, affoat, and another of No. 2 Chicago at \$1 59 in store; No. 2 Milwaukee held at \$1 65@\$1 66 afloat, but offered for delivery in May and June by canal at \$1 58.

Corn has also declined. The demand has been limited, and the desire to realize has been more urgent; prime old mixed declined, consequently, and sold at 63@631c. in store, and 651c. afloat. While new seld at 63@64c, afloat, for Western mixed and 64@65c, for Southern and Western yellow. The market has seemed to be wholly without spirit. The large stock in store and the limited local trade leave prices almost entirely to the views of shippers, and they have been embarrassed by an advance in ocean freights and other circumstances. Yesterday there was a good business in old mixed at 63c. in store, and 651@651c. affort, with prime new mixed at 631c. affort, and eld Western yellow at 641c. In store. Prime mixed to arrive by canal is offered at 62c., with 61c. bid.

Of rye we notice the sale of a boat lead of Canada, in bond for export, at 87c. Barley is again quite unsettled; current receipts by rail all closed out at prices much below those demanded for lots in store.

Outs have been without important variation. The demand has been good and pretty freely met, closing with sales of prime Western mixed 53c. for old in store, and  $52\frac{1}{4}$ @53c. for new affoat.

The fellowing are closing quotations:

#### GROCERIES.

FRIDAY EVENING, April 11, 1873.

The centinued high rate of the premium on gold, coupled with the stringency in money, have been instrumental in checking business somewhat this week, and the transactions are still on a restricted scale. The feeling in mest of the markets is rather depressed, and prices are easy, though not quotably lower. Raw sugars have sold to a moderate extent at last quotations, but refined is off a point, and closes weak in consequence of an over-production. Tea is dull and entirely nominal. Coffee rules quiet, and is held at about last week's prices. Molasses is fairly active at previous rates. Fruits are quiet, but are firmly held. Spices dull and unchanged.

#### TEA.

The arrivals for the past week have been light, but the sales bave been too small to effect any notable reduction of stock, and the position of the market is but little improved aince our last report. Notwithstanding the money stringency, the principal holders of teas continue to hold back their stock and are not pressing sales excepting where prices fully up to quotations can and are not pressing sales excepting where prices runy up to quotations can be realized. Few tales can be made at these prices, however; so trade remains light, and the market is as heavy as has been reported previously. Holders are hopeful that with the easing up in money which is looked for next month trade will become more active and the stock be reduced somewhat. The current sales are chisfly of Greens, and prices on these are relatively steadler than on the other grades. Japans are selling to a very moderate extent, but are held with more firmness than Colongs, which are very dull and correspondingly weak. The entire list of quotations must be considered nominal in the present dull state of trade. The invoice sales for the week

The indirect receipts at New York, principally overland receipts from San Francisco, have been 27,143 pkga, atoce January 1, against 54,707 last year. Imports at San Francisco from Jan, 1 to March 16, were 121,165 lbs. of China and 500,430 lbs. of Japan tea.

#### COFFEE.

The outward influences bearing upon the market have been of a character calculated to sustain prices firmly, with the exception of the disarrangement of money matters here and in the interior. The last Rio telegram did not differ materially from preceding ones, excepting a falling off in the receipte which were then only averaging 5,000 bags daily. The demand here has been light, and the transactions in Rio have not equalled the receipts. The atock has been increased by the arrival of the "P. C. Warwick," bringing 4,505 bags, and sales from over stock have amounted to only about 4,000 bags. There has been a sale of some 4,191 bags to arrive by the "Thetia," now on her way from the Roads. In India coffees the trade has been rather slack, with the exception of Laguayra, which has sold to the extent of 8,187 bags-clearing out the stock. There is very little Maracalbo in first hands, and prices on all of the East and West India grades have been pretty well anstained. The sales include 1,750 bags Santos, ex "Mozart;" 2,007 do. Rio, ex "Merrimack;" 4,191 ex "Thetis," to arrive; 8,137 baga Lagnayra, ex aundry vesaels, mostly sold at 18%c.; 729 do Maracaibo, ex, "Impulse;" 500 do. Java, 1,095 do. Mexican, 764 Ceylon, sold in lots for consumption within our range; 4,036 bags Rio, ex "Hancock," and 1,000 bags ex "Igle," at New Orleans.

Imports at this port the past week have included 4,505 bags Rio, per "P. C. Warwick;" 4,650 do Lagusyra, par "Tres Hermanoa;" 1,445 do St.

| Domingo, per "Weybosset," and 40 do aundries. |                          |           |           |         |           |            |                           |                 |

^{*}Includes mais, &c., reduced to bags.

#### SUGAR.

The financial disturbances and high gold premium have been detrimental to the trade during the past week, but refiners have still operated with a moderate degree of freedom, and the sales have been about equal to the receipts, The stock being well controlled, receivers are not pressing sales very urgently? but are rather more disposed to store the better grades awaiting the improvement in the market, which is generally looked for. The quotable range of the market is not altered from our last issue, and prices are fairly steady on the basis of 828% c. for fair to good refining Muscovado, and 929% c. for Cen-

trifugal. The heavy production of refined sugars is altogether in excess of the trade requirements, and the market has drooped throughout the week closing soft, with prices shaded a fraction from our last quotations. show some steadiness, the best markets being offered somewhat sparingly at the current range of prices. The sales of raws since our last report aggregate 4,978 hhds and 5,700 boxes at 9@9%c. for Centrifugals No. 10 to 13; 8c. for good fair refining; 7%c, for good common; 7%c, for Trinidad, P. S., and other grades within the range. Also 5,200 bags Brazil, part damaged, at 6%@8c.

Imports at New York and stock in first hands April 10, were as follows:

Cuba. Cuba. P. Rice. Other. Brazil Manils.&c. Melado

| Imports this week. 6,670 same time, 72 111,365                         | *inds. *hhds.<br>9,793 1,625<br>72,190 8,561 | *hhde<br>578<br>18,559<br>16,377 | baga.<br>117,559<br>39,083 | †bags.<br>213,194<br>471,423 | hhds,<br>2,125<br>18,508<br>5,590 |

#### MOLASSES.

There is still a fair demand for refining grades of Cuba molasses, but transactions are restricted to a very limited aggregate by the lightness of the stock new in first hands. Holders are asking full rates, too, and the fact is an additional check to refiners' purchases. The new arrivals of Porto Rico are meeting a ready market, and increased activity is noted. The stock of this grade now amounts to 1.145 hhds., and is very strongly held. English Islands has only begun arriving moderately as yet, and the offerings are not very liberal, the stock being reported at only 88 hhds. The supply of New Orleans molasses is running down materially, and from present indications will be cleared out nonsually early this year. At present there are 3,500 bbls in stock, with comparatively little to come forward. Syrnpa are quiet and entirely unchanged. Prices are fairly steady, but lack buoyancy in the absence of active sales. The transactions reported since our last include 50 hhds. new crop Muscovado, 35c.; 510 bbis. New Orleans, 71@73c.

The receipts at New York, and stock in first hands April 10, were as follows:

#### THE DRY GOODS TRADE.

FRIDAY, P. M., April 11, 1878.

The current of trade has continued sluggish, and the volume of business transacted during the week has been light for this period of the year. The stringency in money is now looked upon as the chief detriment to the trade, and should finances become easier by the end of the month, as there seems to be a prospect of the indications are that there will be unusual activity in the late trade. Should the dulness continue there will be much disappointment felt at the result, and the season will prove to be one of the most unsatisfactory for many years. The coming of spring will greatly facilitate the marketing of crops held back in the interior, and with money becoming more easy these country dealers may be disposed to take hold of goods more freely, and will, at least, be able to meet their engagements more readily than for some time past. With the exception of the woolen interest domestic goods are in a much healthier state than foreign. The excessive imports of the past two years have been burdensome to all of the American markets, and the heavy accu. mulations in excess of the trade requirements tell severely in times of stringency like the present. The imports are falling off somewhat now, and are likely to run considerably under last year, if the trade here does not improve very greatly.

DOMESTIC COTTON GOODS .- The jobbing distribution during the past week has been moderate in extent, and the market shows no essential features not before reported. The inquiry is chiefly for the better grades of goods, and these are kept well sold up. Jobbers have found it necessary to replenish their stocks of these qualities, the movement in the lower grades having resulted iu only a small reduction of supplies. Standard grades of brown cottons are sold well up in first hands, and the remaining stocks are very firmly held by agents. The only indications of weakness are on the lower grades, which are rather irregular, and In a few instances quotably lower. The sales of bleached fabrics are fairly liberal in the best grades, but are not generally active, and the market, excepting on the very best qualities, is rather drooping. Prices have undergone no essential changes, except on the cheapest goods, which in some Instances have declined. Colored cottons are In good request in a jobbing way, and with a limited business in first hands the reduced state of stocks sustains prices with a good degree of firmness. The print market has settled down somewhat from the excitement of last week, a satisfactory arrangement having been effected between the agents and the jobbing houses, which had cut under the ruling prices. Ginghams have moved in a small way, and continue to be firmly held. The tendency of prices on prints is thought to be rather toward 11c., as cloths are selling at a price which would about warrant that figure. As yet, however, there has been no quotable reduction of prices. Other cotton goods are in limited demand at firm prices.

DOMESTIC WOOLEN GOODS .- The trade in desirable makes of light weight eassimeres is fairly active, and the stock of these goods is sufficiently reduced to sustain prices firmly. medium and lower grades are quiet, and show signs of a decline, or, at least, are irregular and nominal at the current rates of quotations. The poor material that has been put into the chesper grades of goods, has done much toward injuring their sale, and manufacturers are themselves responsible in no small degree for the current weakness in the cheaper goods. Clothiers have operated very cautiously, their purchases being restricted by the unfavorable outlook which can scarcely be considered as encouraging to purchases largely in advance of actual needs. The demand for flannels and other lighter descriptions of woolens has been light, and quotations are nominal. Dress goods are in very fair request at full former rates.

FOREIGN GOODS.—Although our importations for several weeks past have shown a material falling off as compared with previous years, the stock continues very heavy, and the arrivals are largely in excess of the trade wants. In consequence of the depressed state of trade importers have been led to ship back to Europe considerable quantities of the more costly fabrics, and we hear of one let of about \$40,000 worth of silks, returned to the other side by one of our principal importing and jobbing houses. This course is likely to be highly beneficial to our market, as, in the present monetary stringency, stocks so excessive cannot be other than burdensome. The jobbing demand for staples has improved and the condition of affairs on the chief lines of summer fabries is somewhat improved. The auction houses have no difficulty in getting all the goods they want, but there is some difficulty in pisposing of them.

We annex a few particulars of leading articles of domestic

manufacture, our prices quoted being those of leading jobbers:

|                                                   |                                                | 7.0                                          |                                                                                                                                                 |                                                                                                                                                                                        |
